INDEX to ISA JOURNAL-Volume Three 1956

This is a three-part instant-reference index of all technical articles appearing in Volume 3, 1956, according to month of issue, author, and subject. The page number following the author's name and subject-listing is the first page of the article or articles.

INDEX OF TECHNICAL ARTICLES BY MONTH

Title — Page

JANUARY 1956

Trends Predict 1956 to be Best Year 1
Natural Gasoline Plant Instrumentation 2
Typical Overall Costs of Pneumatic Control Systems 6
Basic Principles of Link and Lever Adjustment 10
Some Functional Considerations for a Low Cost Electronic Analog Computer 13
Transfer Functions Applied to Process Control Dynamics 18
A New Type Displacement Transducer 21
Design Features in the Nation's First Nuclear Power Plant 23
History of the ISA — Part Four 26

FEBRUARY 1956

What's the Direction of Your Automatic Control Policy? 39
Instrumentation for the Process Industries — Pneumatic or Electronic 40
Flow Calculations for Flat Plate Orifices 46
New Horizons in Chemical Analysis Instrumentation 52
An Eight Decade Logarithmic Ohmeter 54
Natural Gasoline Plant Instrumentation — Part Two 57
Installation and Maintenance of Electronic Control Systems 61
Protective Packaging for Precision Instruments 64
History of the ISA — Part Five 66

MARCH 1956

Who's Got the Facts? 75
Applying Statistics to Instrumentation Problems 76
Application of Electronic Control Systems 86
Comparisons of RF and Magnetic Mass Spectrometry 89
Magnetic Amplifiers in Instrumentation 93
Natural Gasoline Plant Instrumentation — Part Three 97
History of the ISA — Part Six 100
Automation is Not New to the Steel Industry 60A

APRIL 1956

Approaching a Common Problem 111
The Direct Analogy Electric Analog Computer 112
A New Circuit for Amplitude Comparison 119
A Coaxial-Cylinder Viscometer for Non-Newtonian Fluids 124
History of the ISA — Part Seven — Conclusion 129
A Practical Application of Transient Response Techniques to Process Control Systems Analysis 134
Considering Today's Problems in Instrumentation 140

MAY 1956

Trends in Data Processing 8A
A Change of Pace 149
Atomic Reactors 150
Electric Analogies for Mechanical Structures 161
Metering of Interplant Flows 168
Frequency Response Analysis 170

JUNE 1956

Opportunities Unlimited 183
Instrumentation for a 'Plug-In' Process 184
Factors in Selecting Data Handling Systems 188
New Centralized Instrument Department at Gulf's Port Arthur Refinery 192
Mechanical-Electronic Transducer for Low Range Pressure and Force 194
Designing a Simulated Rate of Climb Indicator 197
Designing Analogy Circuits from Test Data 201

JULY 1956

No Man's Land 217
A New Approach in Process Control System Design 218
New Apparatus for Friction Measurement 224
How Much Instrument Maintenance? 229
Instrument Courses in U. S. Colleges 234
External Strain-Gage Instrumentation at Transient Elevated Temperatures 236
A Versatile Closure for High Pressure Vessels Utilizing O-Rings for the Initial Seal 241

AUGUST 1956

Dynamics of Specifications 259
Design & Performance of a Thrust Transducer 260
Maintenance Tips for Electronic Self-Balancing Potentiometers & Bridges 265
Putting the Analog Computer to Work 270
Mathematical Description of Gas Flow Processes for Control Purposes 274
Humidity Control Aids Bomber Instrument Testing 281
CIPP Progress Reports 282

SEPTEMBER 1956

The SAMA Story 22A
Automation 295
Education for Automation — A Major Challenge 296
11th Annual ISA Instrument — Automation Conference & Exhibit Program Index Page 331
The IGY Earth Satellite Program 298
Factors in Selecting Valve Actuators for Electronic Control Systems 302
Making a Success of Analytical Control Installations 310
Preventive Maintenance for Process Instrumentation Pays Off 314
Safety and Electronic Control Systems 318
Control Valve Requirements for Gas Flow Systems 323

OCTOBER 1956

Impact! 405
Effect of Automation on Society 406
Instrumentation in Scientific Research 408
Frequency Response Analysis of a Fractionating Column 412
Increasing Reliability of Industrial Data Systems 417
Flexible Temperature Control by Use of Portable Controllers and Plug-in Connections 422
Synthesis of Gas Flow Control Systems 426

NOVEMBER 1956

Automation and Economic Stabilization 14A
Obsolescence 439
Gas Chromatography in Plant Streams 440
Training College Graduates for Engineering Work in an Instrument Company 445
For Sale: A Package of Total Measurements Service 450
Operational Design of Gas Flow Control Systems 454
Dynamic Analysis of a Composition Control Problem 459
New York ISA Show Report 464

DECEMBER 1956

Key to Progress and Prosperity 12A
Hardware or Performance? 481
Frequency Response of Pneumatic Transmission Lines 482
A Before and After Look at Data Logging 486
Continuous Analysis of Argon for Traces of Nitrogen 490
Industrial Weighing with Load Cells 492
Selecting Facilities and Standards for a Total Measurements Service 496
Installation and Operation of a Flow Control System 499

1956 SUBJECT INDEX

Absorber Control 56-97
Absorber Instrumentation 56-2, 57
Altitude Pressure Control 56-219
Amplifiers, Magnetic 56-93
Amplitude Comparison Circuit 56-119
Analog Computer Applications 56-270
Analog Computer, Electric 56-112
Analogies, Electrical, Mechanical 56-161
Analogy Computer, Kit Form 56-13
Analogy Circuits, Design 56-201
Analogy, Direct 56-112
Analysis, Argon Trace 56-490
Analysis, Frequency Response 56-134
Analysis Instrumentation, Chemical 56-52
Analysis, Process Control Systems 56-134
Analysis, Transient Response 56-134
Analytical Control Installations 56-310
Angularity Adjustment, Linkages 56-10
Apparatus, Friction Measurement 56-224
Automatic Control, Reactors 56-150
Automatic Control Policy 56-39
Automation 56-295
Automation, A New Look 56-149
Automation and Economics Nov. 56-14A
Automation Opportunities 56-183
Automation Progress Dec. 56-12A

Biological, Pressure Transducer 56-194
Boilaway Recorder 56-97
Boiling Point Recorder 56-97
Bomber Test Humidity Control 56-281
Bridgman Area Closure 56-241

Calibration Principles, Linkages 56-10
Calibration Standards 56-496
Calibration of Strain Gages 56-236
Caliper, Electronic 56-84
Chemical Plant Instrumentation 56-124
Chemical Analysis Instrumentation 56-52
Chromatography, Gas 56-440
CIPP Committee Meeting 56-123
Comparison Circuit, Amplitude 56-119
Comparison of Pneumatic, Electro-pneumatic & Electro-hydraulic Systems 56-86
Comparison Pneumatic to Electronic Systems 56-40
Compensated Strain Gages 56-236
Composition Control, Infra Red Analysis 56-459
Computer, Analog 56-112
Computer, Analog, Application 56-270
Computer, Insurance Business 56-132
Computer Elements 56-112
Conference, 1956 Annual ISA 56-331, 470
Continuous Analysis, Argon Trace 56-490
Control of Gas Flow Processes 56-274
Control-System Costs 56-6
Control System Design 56-218
Control Systems, Electronic 56-86
Control Theory, Study Course 56-123
Control Valve Requirements 56-323
Controller Applications 56-86
Controller, Magnetic Amplifier 56-93
Controller Transfer Functions 56-18
Cost of Instrumentation; Pneumatic 56-6
Cost Ratio: Instruments to Plant 56-6

Data Handling Systems, Selection of 56-188
Data Logging 56-486
Data Processing, Trends in May 56-8A
Data Processing System 56-133
Data System, Reliability 56-417
Deethanizer Instrumentation 56-57
Deisobutanizer Column Control 56-97
Design, Gas Flow Control Systems 56-454
Differential Pressure Transmitter 56-97
Diode Circuits for Amplitude Comparison 56-119
Disk Friction 56-224
Displacement Transducer 56-21
Distillation Unit Instrumentation 56-57
"Do-It Yourself" Computer 56-13
Dynamic Behavior of Flow Systems 56-274
Dynamic Behavior, Nuclear Reactors 56-150
Dynamics of Gas Flow Systems 56-219
Dynamics, Instrument 56-259

Earth Satellite, IGY 56-298
Economics of Automation Nov. 56-14A
Education 56-111
Education for Automation 56-296
Education Foundation 56-111, 140
Education, Instrument Engineering 56-445
Education and Research in Instrumentation 56-140
Effect of Automation on Society 56-406
Eight-Decade Log Ohmeter 56-54
Electrical-Mechanical Analogies 56-112
Electrical Network Analogs, Design 56-201
Electronic Control Maintenance 56-61
Electronic Control Systems 56-86
Electronic Control, Valve Actuators 56-302
Electronic Control Systems, Safety 56-318
Electronic Self-Balancer Maintenance 56-265
Electronic vs. Pneumatic Controls 56-40
Engineering, Education 56-445
Engine Test Control System Design 56-454
Engine Test Facilities 56-219
Engine Test Facility 56-274
Environmental Tests 56-281
Etched Foil Strain Gage 56-236
Exhibit, ISA 1956 Annual 56-331, 464
Expenditures for Instrumentation 56-1
Explosion Hazards in Electronic Control Systems 56-318

Flight Instrument System, Integrated 56-122
Flow Calculations, Orifices 56-46
Fluid Metering, Interplant Flows 56-168
Food Industry Instrumentation 56-282
Foundation for Instrumentation Education and Research 56-296
Fractionating Column, Frequency Response Analysis 56-412
Frequency Response Analysis of Composition 56-459
Frequency Response Analysis 56-170
Frequency Response Analysis of a Fractionating Column 56-412
Frequency Response, Instruments 56-259
Frequency Response, Process Control Systems, Analysis 56-134
Frequency Response, Pneumatic Transmission Tube 56-482
Frictional Force Measurement of Rotating Disks 56-224
Friction Measurement 56-224

Gas Chromatography 56-440
Gas Flow Control Mathematics 56-274
Gas Flow Control System Design 56-454
Gas Flow Control Systems, Synthesis 56-426
Gas Flow Process Design 56-219
Gas Flow Systems, Control Valves 56-323
Gas Flow System Dynamics 56-219
Gasoline Plant Instrumentation 56-97
Gas Phase Chromatography 56-440
Graphic Panels, LPG 56-57

High Pressure Thermocouple Well 56-241
High Pressure Vessel Closure 56-241
History, ISA 56-26, 66, 100, 129
Humidity Control, Aircraft 56-281
Hydraulic Motor, used as Pressure Dissipator 56-97

IGY, Earth Satellite 56-298
Industrial Data Systems, Increasing Reliability of 56-417
Infra Red Composition Analysis 56-459
Infra Red Spectrophotometer 56-133
Installation Gas Flow Controls 56-499
Installations—Analytical Control 56-310
Instrument Dynamics 56-259
Instrument Education 56-234
Instrument Engineer Training 56-445
Instrument Evaluation 56-76
Instrument Industry Outlook Feb. 56-21A
Instrument Maintenance 56-229
Instrument Packaging 56-64
Instrumentation, Plug-in Process 56-184
Instrumentation in Scientific Research 56-408
Integrated Flight Instrument System 56-122
Interferometer 56-84
ISA 1956 Conference and Exhibit 56-331, 464
ISA Education Foundation Commission 56-140, 297
ISA History 56-26, 66, 100, 129
ISA in 1957 56-396

Labor Views of Automation 56-406
Laboratory Planning, Standards 56-496
Linkages, Principles of Adjustment 56-10
Load Cells, Industrial Weighing 56-492
Load Recorder 56-132
Logarithmic Ohmeter 56-54
Low Cost Analogy Computer 56-13
LPG Plant Instrumentation 56-2, 57

Magnetic Amplifiers 56-93
Magnetic Mass Spectrometer 56-89
Maintenance, Electronic Controller 56-61
Maintenance, Electronic Self-Balancer 56-265
Maintenance, Instruments 56-229
Maintenance, Instrument 56-265
Maintenance Laboratory Plannings 56-496
Maintenance, Preventive 56-314
Maintenance, Statistical Aspects of 56-76
Management Automation 56-481
Management Obsolescence 56-439
Management Views of Automation 56-407
Marketing Facts 56-75
Mass Spectrometry 56-89
Mathematics, Gas Flow Control 56-274
Measurement, Friction 56-224
Measurement of Transient Elevated Temperatures 56-236
Mechanical Displacement Transducer 56-21
Mechanical-Electrical Analogies 56-112
Mechanical Structures, Direct Electrical Analogies 56-161
Mexican Instrument Society 56-12A
Monitoring System 56-132

National Committees, ISA 56-385
Natural Gasoline Plant Instrumentation 56-2, 57, 97
New Ideas in Instrumentation 56-469
Non-Newtonian Fluids Viscometer 56-124
Nuclear Instrumentation 56-283
Nuclear Power Plant 56-23
Nuclear Reactors, Control of 56-150

Obsolescence of Ideas 56-439
Ohmeter, Eight Decade Log 56-54
Operation, Gas Flow Control System 56-499
Opportunity, Through Automation 56-183
Orifice Flow Calculations 56-46
Outlook, Instrument Industry Feb. 56-21A
Oven, Vacuum for Transistors 56-84

Packaging Instruments 56-64
Paper Instrumentation 56-83
Passive Electric Computer Elements 56-112
Personnel Selection, Service 56-459
Plant Stream Analysis, Chemical 56-52
Plug-in Portable Controllers 56-422
"Plug-In" Process, Instrumentation 56-184
Pneumatic Control System Costs 56-6
Pneumatic Tube Frequency Response 56-482
Pneumatic vs. Electronic Controls 56-40
Policy, Automatic Control 56-39
Portable Controllers, Plug-in 56-422
Potentiometer Maintenance 56-265
Power Recovery Control 56-97
Pressure Recovery System 56-97
Pressure Transducer, Low Range Mechanical — Electronic 56-194
Pressure Vessel Closures 56-241
Preventive Maintenance 56-314
Process Control System Design 56-218, 274, 323, 426, 454, 499
Process Control Theory, Study Course 56-123
Process Instrumentation, Preventive Maintenance 56-314
Pulp & Paper Instrumentation 56-283

Radiation Survey Ohmeter 56-54
Radiography Instrument, X-Ray Portable 56-84
Radioisotop Instrumentation 56-283
Rate-of-Climb Indicator, Simulated, Design of 56-197
Reactor, Research 56-133
Recycle Plant Instrumentation 56-2, 57
Refinery Data Logging 56-486
Reliability, Increasing of Industrial Data Systems 56-417
Report, Instrument Education 56-234
Research and Education in Instrumentation 56-140
Research Reactor 56-133
Research — Scientific, Instrumentation in 56-408
RF Mass Spectrometer 56-89
Rocket — Engine Transducers 56-280

Safety and Electronic Control Systems 56-318
SAMA Story, The Sept. 56-22A
Sampling for Instrument Tests 56-76
Satellite, Earth IGY 56-298
Saturable Reactor 56-93
Scientific Apparatus Makers Association, the SAMA Story Sept. 56-22A
